IN PERFECT HARMONY

Il brand Gardenia&Ariana nasce dalla fusione di due realtà storicamente radicate nel distretto della ceramica Made in Italy per dare inizio ad un nuovo percorso fatto di stile, cura del dettaglio e qualità. La tradizione di Gardenia Orchidea, interprete di un gusto più classico e signorile, si intreccia con la sensibilità materica e sperimentale di ceramica Ariana, dando forma ad un catalogo di soluzioni in grado di interpretare le molteplici esigenze del vivere contemporaneo.

Parola d’ordine “eleganza”, ma anche equilibrio e armonia, per dare voce alle diverse forme dell’abitare, perseguendo un’idea di bellezza senza tempo che supera le mode transitorie.

The Gardenia&Ariana brand was born from the merger of two historic companies with roots in the Made in Italy ceramics district, which marked the start of a new project focused on style, exquisite details and quality. The Gardenia Orchidea tradition, famous for its aristocratic, classical taste, meets Ariana’s groundbreaking approach to matter in a catalogue of solutions that respond to the contemporary lifestyle’s many and varying demands.

The key concept is a tasteful, harmonious “elegance”, able to express the different approaches to home design while pursuing a timeless idea of beauty that stands above passing fashions.

SUSTAINABILITY AT ABK GROUP

Per ABK GROUP, la sostenibilità non è un ideale astratto, ma una sfida ampia e complessa che richiede un impegno costante. La transizione verso un modello di sviluppo responsabile è un obiettivo che richiede un’evoluzione delle proprie procedure, tecnologie e processi gestionali. Un percorso fatto di azioni concrete che trova forma compiuta nel nostro bilancio di Sostenibilità.

For ABK Group, sustainability is not an abstract ideal but a broad and complex challenge that requires unflagging commitment. The transition to a responsible development model calls for changes in procedures, technologies and management processes. It is a journey made up of concrete actions set out in our Sustainability Report.

AZIONI PRINCIPALI / PRINCIPAL ACTIONS

Ecobody

Dal 2014, ABK GROUP ha introdotto gli impasti ECO-BODY, formulati con almeno il 40% di materie prime di alta qualità recuperate da lavorazioni interne ed esterne. Questa soluzione, certificata da Bureau Veritas, consente ai prodotti di contribuire al calcolo dei crediti LEED, integrando il design sostenibile degli edifici in una logica di economia circolare. Consulta l'Elenco degli articoli Eco-Body nell'area download di gardenia.it

In 2014, ABK GROUP introduced ECO-BODY formulations containing at least 40% high-quality raw materials recovered from internal and external processes. Certified by Bureau Veritas, this solution allows products to contribute to LEED credit calculations, integrating sustainable building design into a circular economy approach. The list of Eco-Body items can be found in the download area of gardenia.it

COGENERATORE Cogenerator

Negli ultimi sei anni ABK GROUP ha destinato oltre 40 milioni di euro a nuovi impianti produttivi ad alta efficienza, tecnologie avanzate per il recupero energetico e soluzioni per la gestione responsabile delle risorse. Tra questi, l'impianto di cogenerazione attivo dal 2019 nello stabilimento di Solignano consente di produrre il 95% dell'energia elettrica consumata in sito, grazie a un sistema che recupera il calore residuo e lo reintegra nel ciclo industriale, riducendo sensibilmente i consumi e le emissioni.

Over the last six years, ABK GROUP has invested more than €40 million in highly efficient new production facilities, advanced energy-recovery technologies and solutions for responsible resource management. One of these is the cogeneration plant operating at the Solignano factory since 2019, which produces 95% of the electricity consumed on site. By recovering residual heat and feeding it back into the industrial cycle, the system significantly reduces energy consumption and emissions.

RIDUZIONE DEI FUMI Reducing flue gas emissions

ABK GROUP ha adottato un sistema che convoglia i fumi all'interno dell'atomizzatore a oltre 600°C, eliminando le sostanze organiche volatili direttamente in linea, con risultati incoraggianti certificati da monitoraggi trimestrali. Si tratta di una soluzione alternativa ai post-combustori, frutto di due anni di ricerca su materiali e componenti a basso impatto, che ha portato alla sostituzione in fase di decorazione digitale delle colle a base solvente con analoghi prodotti a base acqua.

ABK GROUP has adopted a system that channels flue gases into the spray dryer at over 600°C, eliminating volatile organic compounds directly on the line. The system has shown encouraging results, as certified by quarterly monitoring. This alternative to post-combustion systems is the result of two years of research into low-impact materials and components, leading to the replacement of solvent-based glues with water-based products in the digital decoration phase.

DEGRADÈ

This article comes in several different versions with unconnected patterns that are mixed randomly at the time of packaging. There is therefore no guarantee that all patterns will be present in any individual box. Any variations in graphic designs or textures between adjacent tiles are a natural consequence of the manufacturing process and donot constitute a product defect.

Articolo composto da pattern grafici diversi che non prevedono agganci tra loro e miscelati in modo casuale in fase di inscatolamento. Non si garantisce pertanto la presenza costante di tutti i soggetti all'interno delle confezioni. La non perfetta continuità di linee, rilievi o motivi grafici tra piastrelle adiacenti è naturale conseguenza del processo produttivo, pertanto non costituisce un vizio del prodotto.

This article comes in several different versions with unconnected patterns that are mixed randomly at the time of packaging. There is therefore no guarantee that all patterns will be present in any individual box. Any variations in graphic designs or textures between adjacent tiles are a natural consequence of the manufacturing process and donot constitute a product defect.

Articolo composto da pattern grafici diversi che non prevedono agganci tra loro e miscelati in modo casuale in fase di inscatolamento. Non si garantisce pertanto la presenza costante di tutti i soggetti all'interno delle confezioni. La non perfetta continuit  di linee, rilievi o motivi grafici tra piastrelle adiacenti   naturale conseguenza del processo produttivo, pertanto non costituisce un vizio del prodotto.

Il marchio “Origine France Garantie” certifica che un prodotto è interamente realizzato in Francia o che ha subito la maggior parte dei processi produttivi nel Paese. Questo marchio garantisce l’origine francese, promuovendo il know-how e la qualità della produzione nazionale.

BV Cert. 6200973

QB UPEC and QB UPEC.F+ certifications confirm the quality and durability of building materials, especially floor and wall coverings. UPEC certification assesses resistance to wear, impacts, water and chemicals, while UPEC.F+ guarantees higher safety and fire resistance standards. These marks guarantee that products comply with strict criteria for use in various contexts.

Le certificazioni QB UPEC e QB UPEC.F+ attestano la qualità e la durata dei materiali da costruzione, in particolare dei pavimenti e dei rivestimenti, in Francia. La certificazione UPEC valuta la resistenza all’usura, agli urti, all’acqua e agli agenti chimici, mentre UPEC.F+ garantisce standard più elevati di sicurezza e resistenza al fuoco. Questi marchi garantiscono che i prodotti soddisfano criteri rigorosi per l’utilizzo in vari ambienti.

Logistica nuovi sistemi di imballo

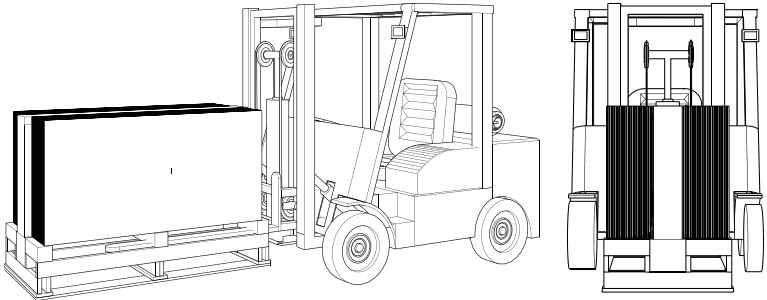

LOGISTICS NEW PACKAGING SYSTEMS

L'innovazione della gamma GARDENIA SLABS si esprime anche attraverso la parte logistica del progetto. Gardenia rivoluziona il sistema di imballaggio delle lastre ed è a oggi l'unica azienda che ha portato il sistema a cavalletto impilabile alla dimensione di cm 75x284x147,5 (lastre 120x280), 75x168x109 (lastre 80x160) e 75x26x200 (lastre 26x200).

- Questi i principali vantaggi offerti:
- essendo impilabile permette di ottimizzare gli spazi all'interno dei magazzini.*
 - la profondità di 75 cm consente di sfruttare a pieno il volume di carico dei container (3 pallets ne occupano perfettamente la larghezza).
 - Il posizionamento verticale del prodotto garantisce una maggiore protezione delle lastre durante le fasi di trasporto.
 - facilita le operazioni sul cantiere in quanto le lastre si trovano già posizionate in verticale, il materiale è facilmente ispezionabile e removibile per l'installazione.
 - le dimensioni complessive del cavalletto consentono maggiori spazi di manovra all'interno dei locali di posa rispetto alle casse tradizionali e agevolano il sollevamento del materiale mediante mezzi meccanici (gru-montacarichi).
 - è caratterizzato da un sistema di regettatura che consente di liberare anche 1 solo collo alla volta, senza compromettere la stabilità del materiale che rimane sul pallet, evitando così il rischio di rotture. Le lastre dovranno essere liberate rispettando la sequenza opposta rispetto a quella con cui sono state confezionate, quindi iniziando dall'ultimo collo regettato.

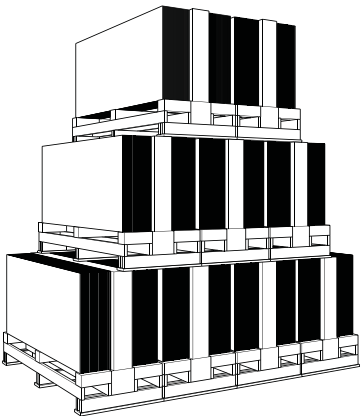

Innovation in the GARDENIA SLABS range is also reflected in the project's logistics. Gardenia has revolutionised the packaging of ceramic slabs and is the only company to have expanded the stacking rack pallet system to the 75x284x147,5 (slabs 120x280), 75x168x109 (slabs 80x160) and 75x26x200 (slabs 26x200) cm size.

- This has the following advantages:
- stacking optimises the use of space in warehouses.*
 - the 75 cm depth enables full use of container load space (3 pallets fit perfectly side by side). The vertical positioning of the product better protects the slabs during shipping.
 - it facilitates work on site, since the slabs are already positioned vertically, making the material easy to inspect and remove for installation.
 - the overall size of the rack pallet provides greater space for manoeuvring in the installation area in comparison with conventional crates, and also makes it easier to lift the slabs mechanically (with a crane or lift).
 - the rack pallet system employs strapping which allows the user to remove a single package at a time without affecting the stability of the other packages on the pallet, thus minimising the risk of breakage. The slabs must be released from the packaging by reversing the packaging sequence, i.e. starting with the last package to have been strapped on.

Modalità di trasporto consigliata per ottenere la massima visibilità.
